Mashal Maqsood *Software Engineer*

mashal.maqsood112@gmail.com 0321-2997820 LinkedIn Portfolio Github

PROFILE

Full Stack Engineer with 3+ years of experience building and maintaining production web applications using React, Node.js, Next.js, NestJS, and MongoDB. Experienced in integrating AI features into real world products, including OpenAI and Claude APIs, n8n based automation, and LangGraph orchestration pipelines. Consistently delivers features end to end, from requirement gathering to deployment.

PROFESSIONAL EXPERIENCE

Techverx, *Software Engineer* 10/2025 – Present

- Full stack engineer on VorpixAI, an AI powered video generation platform built with React 18 and FastAPI, contributing across frontend, backend, and infrastructure in a live production codebase.
- Own feature delivery end to end, building backend APIs in FastAPI and integrating them into the React frontend, working alongside backend engineers and designers on an actively shipping product.

Algolix Technologies, *Full-Stack Web Developer* 08/2023 – 10/2025

- Delivered full stack features across multiple client products using Next.js, NestJS, Node.js, GraphQL, and MongoDB, handling both frontend and backend responsibilities.
- Managed PostgreSQL and MongoDB schemas using Sequelize and Mongoose, including schema design and query optimization.
- Integrated third party payment gateways and social platform APIs, and participated in code reviews to maintain quality across the team.

Dubizzle Labs, *Software Engineer Trainee* 01/2023 – 04/2023

- Built full stack web applications using the MERN stack, including an e-commerce platform and a student portal with secure user authentication.
- Developed responsive UIs with React and worked on backend APIs using Express.js and MongoDB.
- Followed Agile workflows and Git based version control in a team environment.

PROJECTS

Vorpix AI, *AI video creation SaaS* 10/2025 – Present

Frontend: React 18, TypeScript, Redux Toolkit, Tailwind CSS, Framer Motion, React Router, Radix UI
Backend: FastAPI, Python, PostgreSQL, Redis, Docker, AWS S3, AWS ECS Fargate
AI & Integrations: OpenAI, Google Gemini, RunwayML, Cartesia TTS, LangGraph, LangChain, Stripe, YouTube API, Twitter/X API, TikTok API, n8n
An AI powered video generation platform where users can turn structured scripts into fully rendered videos with narration, branding, and multi platform publishing.

- Built video processing APIs handling AI script generation, content regeneration, and media processing via FFmpeg and MoviePy, including branding features like QR code generation and logo background removal.
- Integrated AI and media APIs including OpenAI, Google Gemini, RunwayML for video generation, and Cartesia for text to speech and voice cloning.
- Connected social publishing workflows for YouTube, Twitter/X, and TikTok and integrated Stripe for subscription and payment management.
- Working with AWS S3 for media storage, AWS ECS Fargate for video generation workers, and Docker for containerized deployments.

Conversion Bear, *Shopify App Suite | Algolix Technologies* 2024

Frontend: Next.js, React, Tailwind CSS, CSS
Backend: NestJS, Node.js, GraphQL, MongoDB
Two Shopify apps built for store owners with no coding skills required. One app handled product display with variant management and the other was a custom checkout panel, both fully integrated into the Shopify platform.

- Built and maintained full stack features across both apps using Next.js on the frontend and NestJS on the backend.
- Developed GraphQL APIs to handle communication between the frontend and backend services.
- Integrated both apps into the Shopify platform, managing the integration layer between the two applications and Shopify storefront.
- Built the product variants display app allowing store owners to showcase products with multiple variants in an intuitive UI.
- Developed the checkout panel app and integrated it into the Shopify checkout flow.
- Worked with MongoDB to manage store data, product information, and user preferences.

Young Pioneer Tours, *Travel Booking Web App | Algolix Technologies* 2025

Frontend: Next.js, TypeScript, Tailwind CSS, SSR, SSG
Backend & CMS: REST API, Cookie Based Authentication
SEO & Performance: generateMetadata, Dynamic Meta Tags, Server Side Rendering
A travel booking platform built with two developers, integrating a headless CMS via REST API to dynamically serve tour data, blog content, and destination pages with a strong focus on SEO and performance.

- Built responsive, mobile first UI components using Next.js and Tailwind CSS from Figma designs.
- Integrated the frontend with a backend CMS via REST API to dynamically display tour listings, blog posts, and destination details.
- Implemented cookie based authentication to manage user sessions and protect routes like booking pages and user profiles.
- Built dynamic SEO metadata using Next.js generateMetadata to fetch SEO data from the CMS and populate meta tags, improving search engine visibility.
- Used SSR and SSG strategically across different page types to balance performance and content freshness.
- Conducted cross browser and device testing to ensure consistent functionality across environments.

EstheticMatch, *Aesthetic Healthcare Marketplace | Fiverr* 2024

Frontend: React.js, Tailwind CSS
Backend: Node.js
Database & Cloud: PostgreSQL, AWS
An innovative healthcare platform connecting patients with qualified aesthetic practitioners through intelligent matching, verified reviews, treatment comparison, and secure communication tools.

- Built a practitioner discovery platform with smart matching algorithms to connect patients with suitable aesthetic doctors.
- Developed verified doctor profiles, review systems, treatment comparison tools, and location-based practitioner search.
- Implemented secure messaging features for communication between patients and practitioners.
- Added appointment scheduling workflows to simplify consultation booking.
- Designed responsive interfaces using React.js and Tailwind CSS.
- Integrated PostgreSQL for managing practitioners, treatments, reviews, appointments, and user data.
- Managed AWS S3 for secure media storage and configured CloudFront CDN caching to improve content delivery and performance.

SKILLS

Languages & Scripting: JavaScript (ES2024), TypeScript, Python
Frontend (Framework and Libraries): React.js, Next.js (App Router), Tailwind CSS, Redux Toolkit, Context API, TanStack Query, Framer Motion
Backend (Frameworks and Libraries): Node.js, Express.js, NestJS, FastAPI
AI & Integrations: OpenAI API, Anthropic Claude API, LangGraph, n8n, Prompt Engineering
Databases: PostgreSQL, MongoDB, MySQL, Mongoose, Sequelize, TypeORM, Prisma
API Technologies: RESTful APIs, GraphQL
DevOps & Tools: Git, GitHub, AWS S3, Vercel, Docker (basics), Postman, Cursor AI
Testing: Jest, React Testing Library
Project & Task Management Tools: Jira, Trello, Clickup

EDUCATION

Bachelor of Science in Computer Science, *Kinnaird College For Women University* 01/2018 – 08/2022
